

BAYOMETRIC

The Biometric Solution Provider

BayLock 3000 Fingerprint Access Control

BayLock 3000 Biometric Fingerprint Time & Attendance With Fingerprint Access Control System is an enhanced version of BayLock 500 Fingerprint device. It can store 3000 users locally and has a built-in mifare card reader.

BayLock 3000 has a high resolution optical system & latest biometric technology to provide enterprises a secured and convenient access control system. It has a built in time and attendance system. It is an ideal fingerprint device for remote locations which have internet or LAN connections for communicating to the server.

It can take up to 3 fingerprints per user

It also supports MiFare Cards, each device has an in-built MiFare card reader and writer.

It supports 5 access control methods, i.e. access control with: Fingerprint only, Fingerprint + pin, MiFare card+Fingerprint, MiFare card only, MiFare card only + pin

Each device has a standard Ethernet interface, hence it can be networked

Door control: 1 Door Strike, 1 Door Switch and 12VDC/1.5A

Access logs can be viewed using a web browser and can be exported to Excel or text format

It can operate in both Standalone and Network mode.
